

Automatic Quartzy Order Chrome Plugin

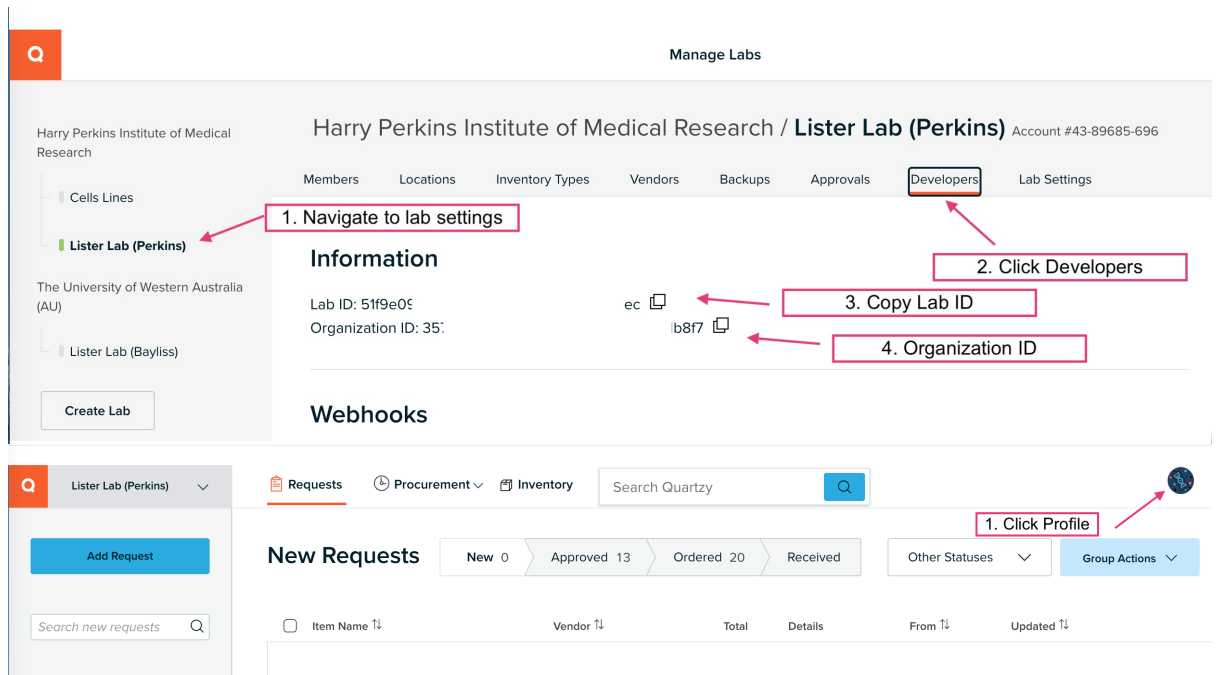

1. Download (git clone https://github.com/cpflueger2016/Quartzy_Product_parser.git) and unzip (from Slack) Quartzy Product parser

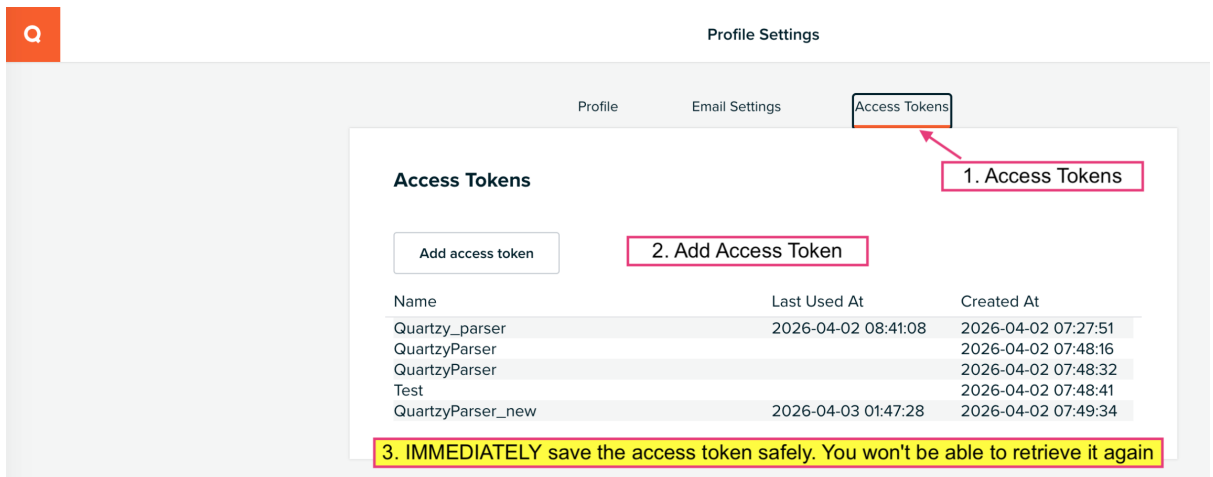

2. Open Chrome, select **Extensions** and enable **Developer Mode**

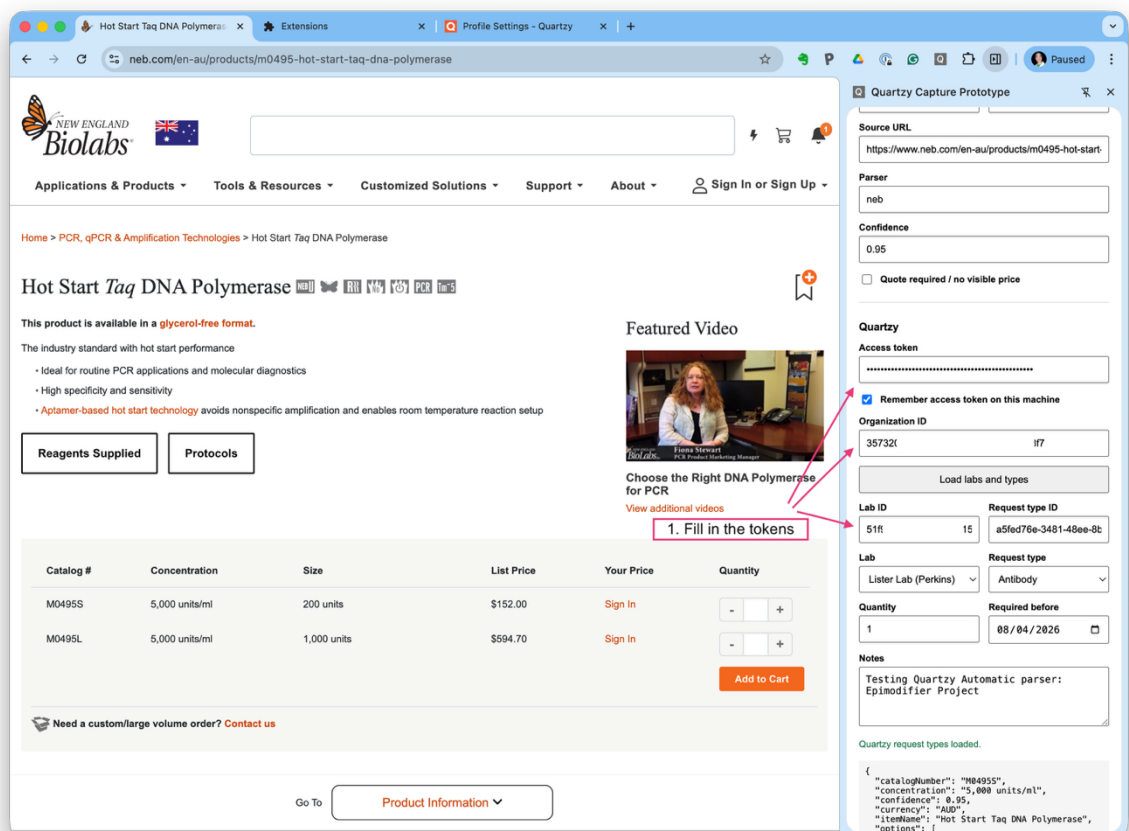

3. Get tokens from Quartzy for:

- a. Institute
- b. Lab
- c. Personal access token

4. Fill in the Tokens

5. Go to NEB or Thermo or Sigma:

- search for product
- click quartz parser in Chrome extension
- fill in details (notes, type)
- submit to Quartzzy

6.

Home > PCR, qPCR & Amplification Technologies > Hot Start Taq DNA Polymerase

Hot Start *Taq* DNA Polymerase

This product is available in a **glycerol-free format**.

The industry standard with hot start performance

- Ideal for routine PCR applications and molecular diagnostics
- High specificity and sensitivity
- **Aptamer-based hot start technology** avoids nonspecific amplification and enables room temperature reaction setup
